#### Announcement of a referral agreement between AGroup and Infor

I am delighted to announce that Infor as a company decided to materialize the cooperation with AGroup with the signature of a referral agreement for the Human Resources and Payroll system HRB commercialized by AGroup across Europe, Middle east and Africa.

The HRB system constitutes an ideal complement to our flagship Financial Software Infor FMS SunSystems. With more than 8,000 clients using daily this complete end-to-end financial package, Infor SunSystems covers all the accounting, reporting and cash management needs of all types of organizations. HRB, with its ease of use and flexibility for use in different legal environments and languages, complements ideally Infor FMS SunSystems. The AGroup teams have specifically worked on having a look and feel close to our Infor software chart, and have developed specific connectors to ensure an easy and intuitive integration on site.

HRB deals with all the main functions of Human Resources Management, inclusive of Payroll and integration with the Financial Systems. Implemented in many customers and translated into the main European languages, it may be implemented alongside with Infor FMS SunSystems in the same implementation project, AGroup teams being knowledgeable on Infor FMS SunSystems. In the direction we have taken, the professionalism of AGroup was a key factor.

The referral agreement signed between our two companies is the first step to a closer integration, on which AGroup and Infor have already started to work.

We advise strongly our clients and partners to get the advantage of this integrated offering, and are setting-up programs to ease the implementation capabilities.
